3rd Nov, 2004

Dear Sir,

**SEWERAGE FACILITIES FOR PART OF PULAU INDAH SECTION 10
- Testimonial**

I am pleased to share our positive experience with the Iseki vacuum interface valves with your potential customers. Phase 1A of the about 35 collection chambers, was connected two years ago and the remainder of the phases will be connected in the very near future. The Iseki valve has proven to be robust and the performance of the valve is dependable, reliable and requiring low maintenance.

Envitech Sdn. Bhd. has been supporting IWK Operation Unit (Klang Branch) with spare parts and other information for about 6 years now.

Based on the valve performance in the above project, I do not hesitate to recommend this product to other systems considering installation of a vacuum sewer.

Thank you.

Yours faithfully

IR. ABDUL RAZAK BIN ADAM
Project Co-Ordination Manager
