

German Water Treatment – RAKIA Free Zone – Ras Al Khaimah

March 14th 2012

To whom it may concern

German Water Treatment first worked with Iseki Vacuum Systems Ltd in the United Arab Emirate of Ras Al Khaimah in 2007. Since that time we have installed Iseki vacuum interface valves and associated materials and equipment on five projects in Ras Al Khaimah, including Al Hamra Village, the RAKIA Free Zone and the RAKIA Industrial Areas.

We have been very satisfied with the quality of Iseki interface valves, specialist equipment and technical services provided to us by Iseki during the past 5 years and do not hesitate to recommend Iseki technology to others with similar foul drainage problems to resolve.

Yours Faithfully
For German Water Treatment FZ LLC

Harald De Priest
